Definition of Disability

For the benefit waiting period and the first 24 months that Long Term Disability benefits are payable, you will be considered disabled if, as a result of physical disease, injury, pregnancy or mental disorder:

- You are unable to perform with reasonable continuity the substantial and material acts necessary to pursue duties of your own occupation and you are not working in your own occupation, or
- You are unable to earn 80% or more of your predisability earnings when working in your own occupation.

You are not considered disabled merely because your right to perform your own occupation is restricted, including a restriction or loss of license.

After the own occupation period of disability, you will be considered disabled if, as a result of a physical disease, injury, pregnancy or mental disorder, you are unable to engage with reasonable continuity in any occupation, or you are working in an occupation but as a result of physical disease, injury, pregnancy or mental disorder you are unable to engage with reasonable continuity in that occupation or any occupation.

Any occupation means all occupations or employment which you could reasonably be expected to perform satisfactorily in light of your age, education, training, experience, station in life, and physical and mental capacity at an occupation within a reasonable distance from your residence, an equivalent distance to your work before disability, or the regional labor market if you reside in a metropolitan area.

If you become disabled before age 62, Long Term Disability benefits may continue during disability until age 65 or to the Social Security Normal Retirement Age (SSNRA) or 3 years 6 months, whichever is longest. If you become disabled at age 62 or older, the benefit duration is determined by the age when disability begins:
