

Exclusive Data Technology Ensures Accuracy, Saves Time and Reduces Risk

Accurate employee data is the key to a healthy retirement plan. Without it, employers can be exposed to greater fiduciary risk, and correcting bad data takes extra time.

To make sure plans stay in shape, we include Participant Data Management in every plan we offer. And we collect data on all employees with every payroll, even those who aren't participating in the plan.

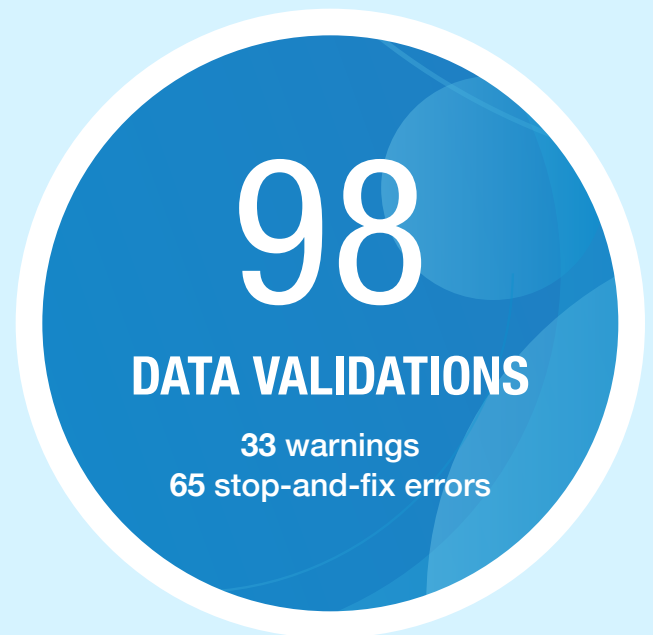

Our proprietary data technology solution keeps errors out of the plan in the first place. We scrub data with every payroll submission by running more than 90 validations. Then we help resolve errors early—and keep a plan running smoothly on clean data.

Unrivaled Process Helps Plans Run Smoothly. Check Out Our Statistics:*

60% of payroll files loaded through PDM had at least one error or warning.

2.7M errors or warnings in total

49K data discrepancies caught by us, keeping money from going into plans by mistake.**

*The Standard's internal data from 2021

**Errors related to ineligible employees and excess loan payments, for example

3 Major Benefits

Higher plan accuracy

- For every payroll, we run more than 90 validations to ensure accurate employee information.
- Clean data makes it easier to track eligibility and vesting.

Less risk

- We ensure the accuracy of employee information, which prevents errors that take time and money to fix.
- Clean data results in fewer discrepancies and lowers an employer's exposure to fiduciary risk.

Time-saving help

- Our solution integrates with an employer's payroll provider, which reduces manual workloads.
- Employers, advisors and TPAs have easy, anytime access to census and contribution data.
- HR staff can spend less time on payroll submissions, census work, compliance testing (and retesting) and year-end reporting.
- We include a team of dedicated data specialists to help set up the process.

We include our data technology solution with every plan we offer. **Call us at 844.239.3561 to learn more.**
