The values shown are for example only and assume no withdrawals during the surrender-charge period; actual results and crediting rates will vary. Fund value less surrender charge is not the surrender value; a market value adjustment also applies. The MVA can increase or decrease the surrender value. The minimum guaranteed surrender value reflects the maximum possible adverse impact of the MVA. The Standard is not responsible for the accuracy or completeness of the information you input.

Understanding Key Features

Surrender-Charge Period

Withdrawals and surrenders may face a charge during the surrender-charge period. This is calculated as a percentage of the withdrawal amount.

Year in Surrender-Charge Period	1	2	3	4	5	6	7
Surrender Charge	9.4%	8.5%	7.5%	6.5%	5.5%	4.5%	3.5%

We waive surrender charges for:

- Scheduled payments of interest earnings
- Required minimum distributions
- Terminal conditions*
- Nursing home residency*
- Annuitization
- Death benefits

continued on reverse

NOT FDIC-INSURED • NO BANK GUARANTEE • MAY LOSE VALUE • NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY • NOT A BANK DEPOSIT

Market Value Adjustment

A market value adjustment applies to withdrawals or surrenders that are subject to a surrender charge. We base the adjustment on a formula that takes into account changes in the MVA Index at that time. We will waive the MVA when the surrender charge is waived.

The MVA can increase or decrease the surrender value of the annuity. Generally, if interest rates have risen since the beginning of the surrender-charge period, the MVA will decrease the surrender value. If interest rates have fallen, the MVA will increase the surrender value.
