The death benefit base is the amount available for your beneficiaries and starts as your total premium amount. On each anniversary, it increases to the higher of:

- **Guaranteed Enhancement Value:** This grows by 6% compounded annually.
- **Performance Enhancement Value:** This applies a growth factor of 200%, or doubles the interest credited to your annuity each year.

- 125% of your surrender value excluding any market value adjustments.
- Your original premium accumulated at a 10% annual effective rate, but not more than 250% of the premium you paid, minus any withdrawals and surrender charges.

---

## Withdrawals

### For non-qualified contracts:

- Withdrawals will decrease the death benefit values by the same percentage that they decrease your account value.<sup>10</sup>

### For qualified contracts:

- Withdrawals up to the RMD amount will reduce the death benefit values by the same amount of the withdrawal.
- All other withdrawals will reduce the death benefit values by the same percentage that they reduce your account value.

---

## Rider Charge

We calculate the rider charge each year on your contract anniversary as a percentage of the benefit base:<sup>11</sup>

- 0.80% for ages 69 and younger at issue
- 1.20% for ages 70-80 at issue

---
