

How will your clients protect their income if they must take time from work to care for a loved one?

Approximately 43.5 million Americans provide unpaid care for an adult or child. One in 10 provides care for a spouse. While most caregivers are women, 40% are men.<sup>1</sup>

The unique **Family Care Benefit**<sup>2</sup> can replace income if you take time from work to care for a seriously ill or injured family member.

<sup>1</sup> Caregiving in the U.S. 2015, National Alliance for Caregiving and AARP Public Policy Institute

<sup>2</sup> The Family Care Benefit is not available in California or New York.
